IES 5.5x6 Sticker.pdf
Auger-Feeder Spec Sheet (2).pdf

Hi Steve,

After discussing the feeder with the manufacturer, it looks like a good option for Red and Bonita. However, there are two points that may rule it out; it has to be bought and secondly it is roughly \$9,000 dollars for the 50 lb. hopper option (see attached "spec" sheet for options).

- ☐ ☐ ☐ ☐ ☐ ☐ Powered via 15 amp, 120 volt circuit.
- ☐ ☐ ☐ ☐ ☐ ☐ Roughly 2'x3'x3'
- ☐ ☐ ☐ ☐ ☐ ☐ Adjustable feed rate based on the size of auger (see attached "sticker" file).
- ☐ ☐ ☐ ☐ ☐ ☐ Delivery in 2 – 3 weeks.

Let me know if this seems viable and I will get it forwarded on to ERRS to further research. I was not able to find a decent auger system outside of this and per our discussion I spent a limited amount of time searching.

Thanks,
Elliott

Subject: RnB - Flocculant Feeder Option

Hi Steve,

I found a viable option for a flocculant feeder system, it is made by Innovated Turf Systems. They have an auger system for granular clay flocculant that looks like exactly what we discussed in the meeting.

http://www.innovativeturfsolutions.com/auger_feeder.html

I have a call into the vendor and they will be sending me additional information on feed rates, operation requirements (power, water, air, etc), and pricing. I researched pellet stoves briefly and was not able to find a full auger assembly for sale. I will be sure to forward on the information I receive and see if this is a viable alternative and if so can send the information on to Matt for procurement.

Thanks,

Elliott
